Comments:

The present application is a continuation of application Serial No. 09/209,746. The specification being filed is not identical to the specification filed in 09/209,746; however, no new matter has been added. Specifically, the Summary of the Invention and the Abstract are changed to coincide with the presently filed claims, which recite that the price of the contract is based on at least one notional cash flow discounted by at least one point on an interest rate swap curve obtained from a swap rate source. This change is supported by the specification of application Serial No. 09/209,746 in Figure 4(b), which provides an exemplary swap rate curve formed from discrete points. In addition to this example, other portions of the specification and drawings may also support the present claims.
